

Our house has existed since 1946 and went through various vicissitudes inextricably linked to our history. It's always used to taking care and helping kids periodically without own family. Since the month of August 2006 is called a Multifunctional facility No. 2 "House in the Garden" in Lębork.

We're governmental institution; the authority is the District of Lębork. Supervision of the proper functioning of the facility is on behalf of the Board of the District Director of the District Lębork Family Support Center in Lębork.

Our house has a range over- commune, permanent residence, which provides day care for children permanently or temporarily deprived of family care. We never split siblings. We try as soon as possible and most effectively normalize the child's legal situation favorably for him (in cooperation with the biological family to return the child to the home).

When the return of the child to the natural family is not possible, we are making efforts to place it in the adoptive family or to provide foster care. We want to surround it with love and care and provide the right conditions for growth.

According to the standards, we take care of 30 children, from birth to six years old.

The Multifunctional facility No. 2 "House in the Garden" in Lębork includes:

- a) care institution – socialization type
- b) care institution – intervention type

In our house since 2000, there is Hostel - County Home for Mothers, as one of alternative forms of assistance to families with young children in the so-called crisis. It's a form of helping without separating the child from the parent.

The help is offered to women with minor and of legal age in the Lębork County.

A) The facility socialization is divided into the following groups:

- A group of the youngest to the first year of life
- A group half-nursery school (2 - 4 years old)
- A group of preschool (4 - 5 years)

Children in 6 years old to implementing the program called "0" class at school, close to our home. The facility employs a staff of higher education teaching.

Younger class tutor / babysitter - organizing the work of a group of children (no more than 10 children) and individual work with the child, carrying out tasks under

from an individual work plan and remain in constant contact with the child's

family. Social Worker – is working with the child's family, recognizes its family situation,

is in contact with the institutions that support the family in the environment, initiate the necessary measures to normalize the situation and allow the family to return the child.

The work of a younger teacher / child carer support workers whose employment due to provide children with proper care, safety and proper functioning of the institution. The facility maintains contact with social workers social welfare center, in the place of the child in order to obtain information about his family situation.

B) The intervention facility is called Emergency Assistance for the duration of the crisis in the family.

Depending on the age and needs of the child, it will be in the care and maintenance of enhanced health care and education, taking into account the reason for staying. In case of urgent cases that requires immediate start of taking care welfare and education the intervention facility accepts new children without referral, at the request of the District Court Judge, Family Court, the Police or the person stating abandonment of the child or endanger the health and life of a child resulting from improper care or its absence.

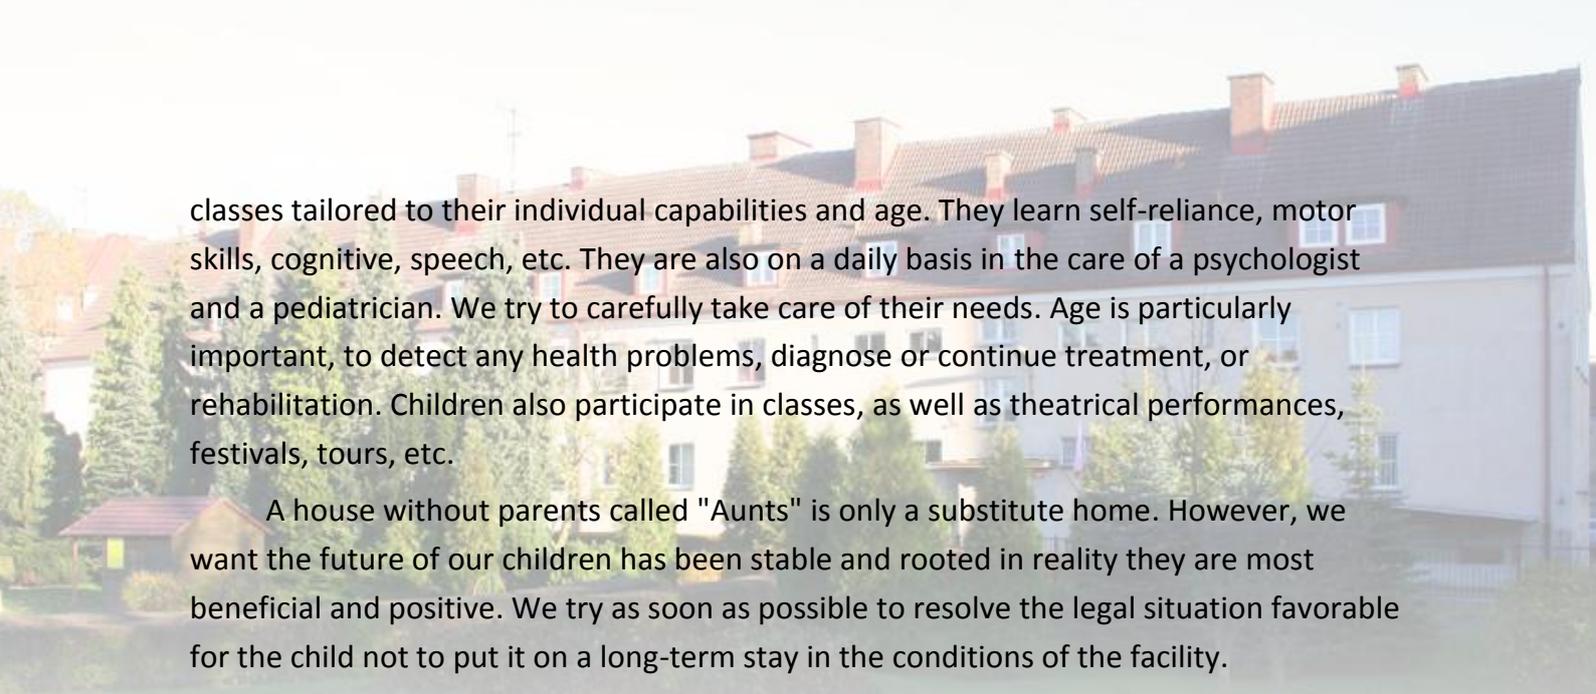

We assume that the child stay up to 6 months. If litigation legal status of the child is pending, the stay may be extended for a further six months. At this time, we make a comprehensive diagnosis of the child's family situation, causes and problems of psychological diagnosis - educational, legal, intensive social work in close cooperation with all institutions and organizations working for children and families appropriate for the place of residence or domicile of the child's parents.

For each child there are following documents:

- a) an individual plan of work;
- b) a residence, supplemented monthly assessment of the relationship of a child with his parents, how it functions, the level of its overall capacity, health status, information on the specific needs of the child and significant events for the child;
- c) participation in the class card specialist with the description of their course;
- d) forms of psychological research and observation.

Protection and care of children from the fourth day of life up to 1 year old deal with the medical staff - nurses. Care for children over 1 year old exercise with education teaching staff - junior tutor / babysitter. The provision of the proper stimulation and development ensures physiotherapist.

The team of employees is also support staff, without whose cooperation it would not be proper functioning of the institution. Children participate in the appropriate

classes tailored to their individual capabilities and age. They learn self-reliance, motor skills, cognitive, speech, etc. They are also on a daily basis in the care of a psychologist and a pediatrician. We try to carefully take care of their needs. Age is particularly important, to detect any health problems, diagnose or continue treatment, or rehabilitation. Children also participate in classes, as well as theatrical performances, festivals, tours, etc.

A house without parents called "Aunts" is only a substitute home. However, we want the future of our children has been stable and rooted in reality they are most beneficial and positive. We try as soon as possible to resolve the legal situation favorable for the child not to put it on a long-term stay in the conditions of the facility.

Location of the House, even though we're in town, it is very good. We have a very nice green property that is "favorable" for children. There is a large garden of lawns and green conifers. We also have a children's playground. Each group of our children lives in the so-called section, which features colorful bedrooms, drawing rooms, bathrooms, dining rooms, etc. The house is two-storey, surrounded by green plants, and the parcel on which it is located is 0.59 ha.

We are always looking for partners for cooperation and assistance for our "House in the Garden" in finding the financial resources that could be spent on immediate needs, such as repairs, buying disposable diapers, cosmetics, and other important things, so very relevant for the care and maintenance of a small child. Any kind of help or support, interest in us is important to us, especially in view of the multiplicity of needs that we have to cope with.

Our "Home in the Garden" is always full of hustle and smile of kids staying here.
